

LotoAI User Guide

Getting Started

Welcome to LotoAI! This guide will help you get started with uploading documents and using the chat interface. The system is designed to be intuitive and requires no technical knowledge to use.

Uploading Documents

Step 1: Click the 'Upload' button in the top right corner. Step 2: Select one or more files from your computer (PDF, Word, or text files). Step 3: Wait for the upload to complete - you'll see a progress indicator. Step 4: Once uploaded, documents are automatically indexed and searchable.

Using Chat

The chat interface allows you to ask questions about your uploaded documents. Simply type your question in natural language and press Enter. The AI will search your documents and provide relevant answers with source citations. You can ask follow-up questions to dive deeper into topics.

Search Tips

Be specific: More detailed questions yield better results. Use keywords: Include important terms from your documents. Ask one thing at a time: Break complex questions into smaller parts. Check sources: Always verify the cited document sections.
